

NATURE

By: Mayura Savill

NATURE

Nature is beautiful, but nature also has to have its ups and downs:

HELP MOTHER NATURE!

NATURE CAN HELP US!

- It can help us feel peaceful
- It gives a lot of fun and memories
- You can explore it throughout the different seasons
- It's a whole different world to the busy city's, and it also is a place where you can escape
- Finally, it can also help us learn lots!

DON'T DESTROY NATURE!

Sadly not everyone enjoys nature.
Instead they:

- . Wreck places and cut down trees, which also destroys animals habitats
- . They use trees for toilet paper, and also cut down trees for farming lands
- . Take what isn't there's
- . If we work together, we can STOP this!

WHAT YOU CAN DO WITH NATURE

You can do so many things with nature, without hurting it. You can discover, make and design stuff. It's free and fun and we can help our world at the same time! You can:

- Make birds nests for you and the birds
- Make twig and leaf art
- Collect and discover things
- Play games
- And most importantly, LEARN!

HOW TO MAKE A BIRDS NEST-STEP 1

BIRDS NEST

You can make things
like a birds nest easily!
Here's how:

First gather up things
like sticks, hay, moss,
leaves, and anything
else for decoration.

STEP 2

Then find a good tree, with
a round shaped bowl in the
branches.

STEP 3

Use sticks or hay, and put them down to create a base.

STEP 4

After use more sticks and hay for the sides. If you use sticks, build it up in a bridge and cover it with moss. If you want to use hay, then shape the hay a bit and place it where you want to.

STEP 5

When you've finished you can decorate it: pad it with moss, make a place for some eggs, or decorate with leaves and stones!

HOW TO MAKE LEAF ART- STEP 1

LEAF ART

Do you like art and nature? Well if you do, here is a perfect combination!

First gather all the things you need: Stones, leaves, berries, twigs, hay, grass or flowers!

STEP 2

Clear some mud
on the ground so
your place to
make your leaf
art is even

STEP 3

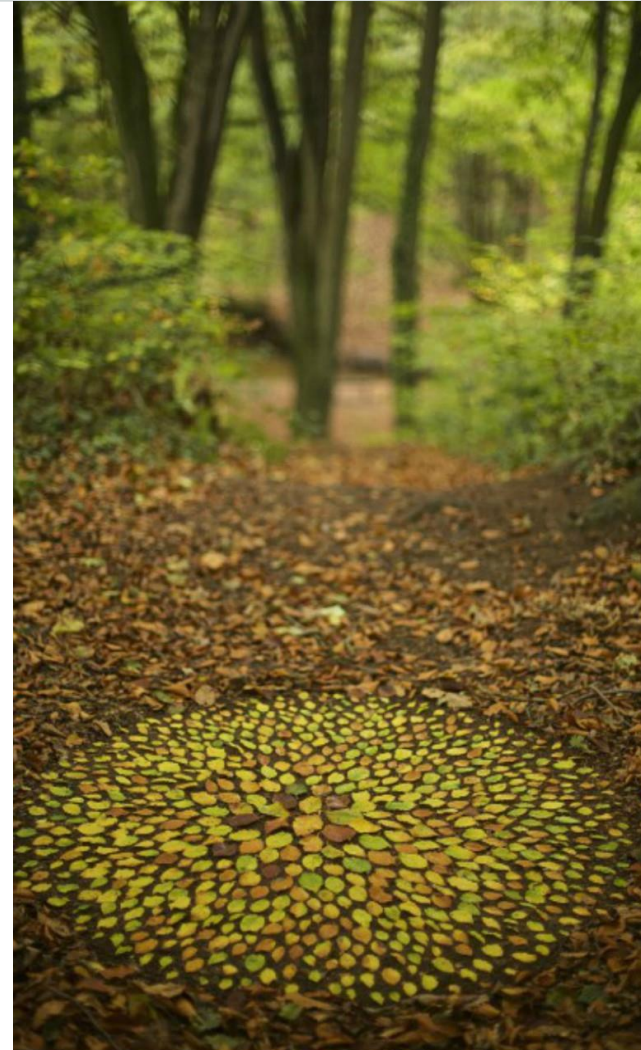

Then think of a nice pattern, and start of your design by laying a berry or something as place of pride in the middle.

STEP 4

After, start your pattern and go in a round circle, making it bigger and bigger. If you need to clear more mud to make it even, then make your artwork **EVEN BIGGER!**

STEP 5

When you have finished, add all of the decorations of your choice. Finally, take a photo to remember it, so you can always see your amazing artwork!

Nature is home to so many things. It also helps with lots of things. So why don't we return the favour and protect it from being destroyed? So set out as soon as you can to some nature and explore it! It can be ANYWHERE! Even your back garden. So as soon as you can, set out for YOUR adventure to help nature!

EXPLORE, HELP
AND DISCOVER!

THANK YOU FOR
WATCHING!
