

Humpty Dumpty goes Skydiving!

Humpty Dumpty has decided he wants to do a skydive – and he needs your help! You will need to design and make a parachute that

will carry Humpty safely to the ground.

You will need: a boiled egg, string, Sellotape, material for the parachute. Some things you might want to think about are:

- The size and shape of your parachute
- How much string you will use
- How you will attach Humpty to the parachute

Use the table below to plan your parachute.

Shape of parachute	
Size of parachute (cm)	
Length of string used (cm)	
How will we attach Humpty?	

Now make your parachute.

Did Humpty survive his skydive?
